

## Discover YOUR street landscape

*Friends Re-greening Embassy Row*

*RestoreMassAve.org*

### 3 steps to beautify YOUR block of DC

- 1 STREET TREES** Look for gaps in the row or bad trees that should be removed. Choose tree species you prefer. Request the City to plant them.<sup>a</sup>
- 2 SECOND ROW** Look for land between the sidewalk and the buildings that is suitable for growing trees.<sup>b</sup> The facing property owner or block association may plant there, after Miss Utility has marked the underground lines.<sup>c</sup>
- 3 REMOVE VIEW-BLOCKERS** Persuade neighbors to remove unsightly shrubs, small trees and fences that block one unified street view. City rules prohibit fences, etc. higher than 3 feet in the “parking.”

*a The DDOT Urban Forestry Administration (UFA) plants trees using 311  
b In Washington DC this is city land called the “parking”. Why ? Because the city wants it to look like a park ! See [restoremassave.org/green-your-street/second-row-of-trees](http://restoremassave.org/green-your-street/second-row-of-trees).  
c You are required to have MissUtility.org mark underground lines before digging.*
